

**TWO-PIECE OIL CONTROL RING
ELECTRA-GLIDE AND SPORTSTER MODELS**

A two-piece oil control ring has been in use on the Sportster and Electra-Glide engine since the start of the 1966 model season.

This ring for the lower piston ring groove consists of a ventilated cast iron double edged scraper ring with a separate expander spring behind it.

The new two-piece oil ring is now included in all standard and oversize piston ring sets and piston assemblies supplied for parts orders.

Part numbers for these assemblies have not changed.

Rail type oil control rings will no longer be supplied.
