

LUBRICATING OIL RECOMMENDATIONS

The following change in lubricating oil recommendations is being made for all Harley-Davidson 4-cycle motorcycles.

Use proper grade of oil for the lowest temperature expected before the next oil change period as follows:

<u>Use Harley-Davidson Oil</u>	<u>Use Grade</u>	<u>Air Temperature (Cold Engine Starting Conditions)</u>
Medium Heavy	75	Above 40° F.
Special Light	58	Below 40° F.
Regular Heavy	105	Severe Operating Conditions At High Air Temperatures

The above recommendations reflect the trend toward lighter oils made possible through the development of better lubricating qualities. The lighter oils greatly improve ease of starting on motorcycles having kick starters.

Note: This bulletin is your authority to follow above new oil recommendations which supersede any previously published information in service manuals, handbooks or oil can labels.
